

CROFT AVENUE – FIBRE CONNECTIVITY

In 2021 a majority of residents agreed to seek a quotation from BT to install Fibre Optic cable to enhance Broadband connectivity for the whole of Croft Avenue.

The existing copper cables which at present connect all houses in the road limit maximum speeds for data at 60Mbps at best. Fibre would enable speeds of up to 1Gbps.

A final price of £12,142 was agreed and was funded by a voluntary payment of about £460 by residents.

The installation was completed in 2023.
